

# Affordable Energy Report Card

Evaluating the impact of energy policies on working New Jerseyans

## Home Electrification

*Replacing natural gas furnaces and central air-conditioning with electrically-powered heat pumps.*

***Home Electrification is an expensive proposition for working New Jerseyans.***

### Feasibility

*Heat pumps struggle in summer and winter. Many experts recommend keeping your furnace.*

### Reliability

*Average lifespan of a heat pump is 15 years. Natural gas furnaces last 20-30 years.*

### Cost

*It costs \$20,000+ to install a heat pump system in a 1,900 square foot home.*
